Nautilus Scuba Club Cairns

Mabul Hatchery Nest Guardian

Species: Green Sea Turtle

Nest ID number: SJ13062025 (2)

Number of eggs: 100

Date laid: 13/06/2025

Location: Pulau Mabul, Malaysia

Thank you for adopting a Green Turtle nest and supporting the Mabul Turtle Hatchery. Your support makes it possible for us to protect endangered turtles through community-led conservation. When a nesting turtle is discovered, the community contacts our trained staff who carefully relocate the nest to the hatchery. The community member then receives a reward which is higher than the amount they would get from selling turtle eggs on the black market.
